OBSERVATION INFORMATION

| Species     | Date(s) Observed | Spawning | Rearing   | Migration | Anadromous |
|-------------|------------------|----------|-----------|-----------|------------|
| <u>Coho</u> | <u>6/28/93</u>   |          | <u>12</u> |           |            |
|             |                  |          |           |           |            |
|             |                  |          |           |           |            |
|             |                  |          |           |           |            |

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: 12 rearing coho were shocked in 6 locations along the segment indicated on the map. Many other coho and dolly varden were seen throughout the area. This was an excellent rearing stream with good spawning gravel also present.

Name of Observer (please print) James P. Carriello  
Date: 10/18/93 Signature: James P. Carriello  
Address: A.D. F+G  
Box 667 Petersburg, AK

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: Paul D. Connel
